English	Fluent

Summary

Computer Science graduate with hands-on experience in **full-stack** development through academic and independent projects. Skilled in **React**, **TypeScript**, **Node.js**, **Express**, **MongoDB**, and **REST APIs**. Built **end-to-end** web applications including **authentication**, role-based access, and **real-time** features. Seeking a junior software developer position to grow within a professional engineering team.

Selected Projects

CodeBlock

INDIVIDUAL PROJECT

Real-Time Collaborative Coding Platform

- Developed a **real-time** collaborative **JavaScript** coding platform using **React**, **TypeScript**, **Node.js**, **Express**, **MongoDB**, and **Socket.IO**.
- Implemented **role-based access control** (mentor / student), live code synchronization, and a **real-time** feedback system.
- Designed the system using **client-server** architecture and **REST API** communication; integrated **Monaco Editor** for in-browser editing.

React

TypeScript

Node.js

Express

MongoDB

Socket.IO

Monaco

DevMentor AI

INDIVIDUAL PROJECT

AI-Powered Interview Preparation Platform

- Developed a **full-stack** platform that simulates technical interviews using AI, enabling users to practice both theoretical and coding questions.
- Designed a dynamic interview flow with topic and difficulty selection, generating personalized interview sessions.
- Implemented **AI-based** evaluation to score user responses and provide structured feedback.
- Built a performance tracking system to monitor user progress, including interview history, scores, and improvement over time.

React

TypeScript

Node.js

Express

MongoDB

REST APIs

AI Integration

Smarketing

TEAM PROJECT

AI-Driven Marketing Automation SaaS

- Developed an **end-to-end** SaaS platform helping small and medium businesses centralize **digital** marketing.
- Automated campaign creation, personalized landing pages, onboarding flows, and third-party API integrations.
- Selected to present the platform on Shark Tank Israel.
