PROJECTS

Dohot · AI-Powered Mobile Platform for Field Technicians

React Native · Expo · TypeScript · Node.js · PostgreSQL · Supabase · OpenAI

- ▶ Built a mobile app used by service businesses and field technicians to generate reports, quotes, and PDFs on-site, **replacing paper workflows** and reducing admin time.
- ▶ Integrated **OpenAI** to generate and restructure reports from short prompts, **significantly reducing writing time** and simplifying on-site reporting for non-technical users.
- ▶ Developed the full stack: forms, image capture, **PDF generation**, and Supabase-backed auth, storage, and role management.

DevMentorAI · AI Interview Simulation Platform

React · TypeScript · Node.js · Express · MongoDB · OpenAI

- ▶ Built an AI interview simulator that creates personalized coding and theory sessions, giving users a focused way to prepare for technical interviews.
- ▶ Designed a **scoring engine** delivering structured, **actionable feedback** and helping users identify gaps and improve faster.
- ▶ Added progress tracking with scores and session history so users can see real improvement over time.

Smmarketing · Marketing Automation SaaS for SMBs

React · TypeScript · Node.js · Express · MongoDB · Google Ads API

- ▶ Worked in a **5-person development team** building a **multi-tenant SaaS** that centralizes digital marketing for SMBs, **reducing manual campaign management** and giving owners one place to manage everything.
- ▶ Contributed to integrating the **Google Ads API** to automate campaign creation, audience targeting, and personalized landing pages.
- ▶ **Selected to present on Shark Tank Israel**, recognized for real-world product viability and **commercial potential**.
